Label Elements

Hazard Symbol:

	Wash contaminated clothing before reuse. Collect spillage.
Storage:	Store locked up. Store in a well-ventilated place. Keep container tightly closed.
Disposal:	Dispose of contents/container to an appropriate treatment and disposal facility in accordance with applicable laws and regulations, and product characteristics at time of disposal.
Hazard(s) not otherwise classified (HNOC):	None.

4. First-aid measures

General information:	Get medical attention if symptoms occur.
Inhalation:	Move into fresh air and keep at rest. Get medical attention immediately. Show this safety data sheet to the doctor in attendance.
Skin Contact:	Immediately flush with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention if symptoms occur. Wash contaminated clothing before reuse.
Eye contact:	Flush thoroughly with water for at least 15 minutes. Get medical assistance.
Ingestion:	Rinse mouth with plenty of water. Call a physician immediately. Show this safety data sheet to the doctor in attendance.
Personal Protection for First- aid Responders:	CAUTION! First aid personnel must be aware of own risk during rescue! See Section 8 of the SDS for Personal Protective Equipment.
Most important symptoms/effe	cts, acute and delayed
Symptoms:	See section 11 of the SDS for additional information on health hazards.
Hazards:	See section 11 of the SDS for additional information on health hazards.
Indication of immediate medica	al attention and special treatment needed
Treatment:	
Treatment.	Treat symptomatically.

Do not use water jet as an extinguisher, as this will spread the fire. During fire, gases hazardous to health may be formed.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures:	See Section 8 of the SDS for Personal Protective Equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Keep unauthorized personnel away.
For non-emergency personnel:	Use personal protective equipment.
For emergency responders:	Warn everybody of potential hazards and evacuate if necessary. Use personal protective equipment.
Methods and material for containment and cleaning up:	Absorb spill with vermiculite or other inert material, then place in a container for chemical waste. Dike far ahead of larger spill for later recovery and disposal. For waste disposal, see section 13 of the SDS.
Environmental Precautions:	Avoid release to the environment. Prevent further leakage or spillage if safe to do so. Do not contaminate water sources or sewer.
Prevention of secondary hazards:	No data available.
7. Handling and storage	
Precautions for safe handling:	Do not get in eyes. Wash hands thoroughly after handling. Do not handle until all safety precautions have been read and understood. Obtain special instructions before use. Use personal protective equipment as required. Avoid contact with skin. Avoid contact with eyes, skin, and clothing.
Conditions for safe storage, including any incompatibilities:	Store locked up.

Appropriate Engineering Controls

Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Emergency showers and eye wash stations should be available.

Individual protection measures, such as personal protective equipment

General information:	Educate and train employees in the safe use and handling of this product. Do not eat, drink or smoke when using the product. Eye wash facilities and emergency shower must be available when handling this product. Wash at the end of each work shift and before eating, smoking and using the toilet.
Eye/face protection:	Safety goggles
Skin Protection Hand Protection:	Additional Information: Protective gloves should be used if there is a risk of direct contact or splash., Chemical resistant gloves required for prolonged or repeated contact., Butyl rubber., Glove thickness: > 0.35 mm, Break-through time: > 240 min, Risk of splashes:, Nitrile rubber., Nitrile gloves are recommended, but be aware that the liquid may penetrate the gloves. Frequent change is advisable., The most suitable glove must be chosen in consultation with the gloves supplier, who can inform about the breakthrough time of the glove material.
Skin and Body Protection:	Wear suitable protective clothing as protection against splashing or contamination.

Respiratory Protection: Under normal conditions of use, respirator protection is not required. In case of inadequate ventilation, use respiratory protection. If respirators are used, OSHA requires compliance with its respiratory protection program (29 CFR 1910.134). Hygiene measures: Employees should wash their hands and face before eating, drinking, or using tobacco products. Keep away from foodstuffs, drinks and tobacco.

9. Physical and chemical properties

Appearance

10. Stability and reactivity

Reactivity:

Material is stable under normal conditions.

Chemical Stability:	Material is stable under normal conditions.
Possibility of hazardous reactions:	Not known.
Conditions to avoid:	Avoid heat or contamination.
Incompatible Materials:	None known.
Hazardous Decomposition Products:	By heating and fire, harmful vapors/gases may be formed.
11. Toxicological information	ו
Symptoms related to the phys Inhalation:	ical, chemical and toxicological characteristics Inhalation is the primary route of exposure. In high concentrations, vapors,

	fumes or mists may irritate nose, throat and mucus membranes.
Skin Contact:	Causes skin irritation. May cause an allergic skin reaction.
Eye contact:	Causes serious eye damage.
Ingestion:	May be ingested by accident. Ingestion may cause irritation and malaise.

Information on toxicological effects

Acute toxicity (list all possible routes of exposure)

Oral Product:	ATEmix: 2,433.01 mg/kg
Dermal Product:	ATEmix: 18,329.27 mg/kg
Inhalation Product:	Not classified for acute toxicity based on available data.

13. Disposal considerations	
General information:	Waste disposal should be in accordance with existing federal, state and
	local environmental control laws.
Disposal instructions:	Discharge, treatment, or disposal may be subject to national, state, or local
	laws. Since emptied containers retain product residue, follow label warnings
	even after container is emptied.
Contaminated Backaging	Dispose in accordance with all applicable regulations
Contaminated Packaging:	Dispose in accordance with all applicable regulations.
US. RCRA Hazardous Waste	If discarded in its purchased form, this product would not be a hazardous
Classification (40 CFR 261)	waste either by listing or by characteristic. However, under RCRA, it is the
	responsibility of the product user to determine at the time of disposal,
	whether a material containing the product or derived from the product
	should be classified as a hazardous waste.
